I. BATH CORRELATION FUNCTIONS AND SPECTRAL DENSITIES

Bath correlation function

$$C(t) = \text{Tr}\{U_B^\dagger(t)\Delta V U_B(t)\Delta V w_{\text{eq}}\} \quad (1)$$

Fourier transform of the bath correlation function

$$\tilde{C}(\omega) = \int_0^\infty dt C(t)e^{i\omega t} \quad (2)$$

Spectral density

$$J(\omega) = \sum_\xi |g_\xi|^2 \delta(\omega - \omega_\xi) \quad (3)$$
